Deskman

teleportconnect.com

PHYSICAL AI, FOR SOFTWARE PEOPLE

Give your code a face.

Deskman is a compact robot built for developers who want to learn physical AI. Talk to it, script it, swap its parts, rewrite its brain.

If you can code, you're ready. Deskman teaches you the rest.

Skills you need

- Use the command line
- Cursor or Claude Code
- An OpenAI account

Skills you'll learn

- Servo and motor control
- Face tracking from a camera
- Building a voice AI agent

Teach Deskman tricks. Learn real skills.

Vision

Turn to look at you
`Face tracking`

Describe what you hold up
`Vision-language models`

Voice and AI

Answer with a local LLM
`On-device AI`

Translate in real time
`Speech-to-speech`

Expression and motion

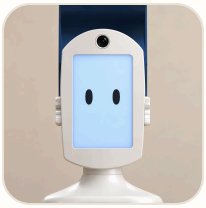

Show emotions on its face
`State machines`

Follow whoever is talking
`Sound localization`

Just for fun

Suggest a recipe from your counter
`Object detection + LLMs`

Nod back at a thumbs-up
`Gesture recognition`

Includes

- 7" touchscreen
- 1080p camera
- 5,800mAh, 3 hour battery
- Speaker + mic
- Three servos
- Wi-Fi
- 3D-printed body

`Standard`

Raspberry Pi edition

$499 or lease for $49/month

The everyday Deskman. Cloud-connected voice and video calls, ready to go. Pi 5, 2GB RAM + 32GB SD.

`Pro`

NVIDIA Jetson Orin Nano edition

$999 or lease for $99/month

More AI power for running more models on-device, for builders and researchers. 8GB RAM + 256GB SSD.
